CashComplete™

SDS-700

Complete Cash Automation for Smart Cash Management

Lower Costs by 30%

Optimise your cash management to get the most out of your work force

cashcomplete.com

Secure, Seal and Simplify Your Cash

The SDS-700 is a high-speed note deposit solution for both back office and front office environments. The SDS-700 cuts the costs of cash management through internal, and CIT pick-up and delivery optimization. It is a secure, smart and high performance note deposit unit.

Automated Note Counting

The notes are counted and compiled automatically in seconds. Information of deposits and total sum of each denomination is generated in real-time.

Small Footprint

Since the solution packs the bank notes, it can handle large volumes in a small area. It has a small footprint and can be placed even in the smallest environments.

Web Based Cash Management

Reports are sent to the financial department as well as to the CIT company or bank at the end of the day. Reconciliation has never been easier.

Bundle Note Deposits

Bundle note deposits of up to 200 notes at a time, make the cash handling process extremely easy and efficient.

Full Control Through Serial Number Recognition

Through serial number recognition you will always get exact information about each note, such as time of deposit and who deposited it.

Heat Seal Bag

The staff has no access to the bank notes until the bag is opened at the CIT company. The bag is identified with a bar code, giving you full control and security.

High Security

A Smart Deposit Solution increases the security of your employees. The solution is certified by the insurance companies.*

*Applies to the customer's insurance.

Efficient CIT Processes

Through an on-line connection, the CIT company receives information when your machine is full and needs to be emptied.

High Speed Processing

The SDS-700 is one of a kind through its high speed of up to 1,000 notes per minute.

► High speed with security features

► Easy to learn and train

► Self-sealing technology

► Can connect to a coin unit

► Multi-currency capability

► Monitoring system
